# Peaches

## Alabama, Georgia, South Carolina

### Crop Insured

All of your peaches (including nectarines) in a county are insurable if:

- The actuarial documents provide premium rates;
- They are grown for the production of fresh or processing peaches;
- They are grown in an orchard that, if inspected, is acceptable to the insurance company;
- They are grown on trees that have reached at least the fourth growing season after set out; and
- You have a share in the peaches.

Peaches are also insurable if they are grown on tree varieties that:

- Were commercially available at tree set out;
- Are a variety with a chilling hour requirement appropriate for the area; and
- Are grown on a rootstock adapted to the area.

If the trees have not reached the fourth year, the acreage may still be insurable by written agreement provided the trees have produced at least 100 bushels per acre.

### Counties Available

See actuarial documents at the [Web Actuarial Information Browser](#) for insurable counties. The crop may be insurable in other counties by written agreement if specific criteria are met. Talk to your crop insurance agent for more details.

### Causes of Loss

You are protected against the following:

- Adverse weather conditions;
- Earthquake;
- Failure of irrigation water supply, if caused by an insured peril during the insurance year;
- Fire;
- Insects or plant disease, but not damage due to insufficient or improper application of control measures;
- Insufficient chilling hours;
- Volcanic eruption; or
- Wildlife.

### Insurance Period

Coverage begins on November 21 of the first year of application (talk to your crop insurance agent for limitations on the starting date). For each subsequent renewal year, coverage begins the day following the end of insurance.

### Important Dates

Sales Closing/Cancellation ..... November 20, 2017  
Acreage Reporting ..... January 15, 2018  
Premium Billing ..... August 15, 2018  
Termination ..... November 20, 2018

### Reporting Requirements

**Acreage Report** - You must report all acres of the crop, in which you have a share in the county, to your crop insurance agent by the acreage reporting date.

**Production Report** - A production report, by type, is required by the production reporting date. You must also report:

- The number of bearing trees on insurable and uninsurable acreage;
- The age and planting pattern of the trees;
- Any damage to or removal of trees; and
- Any change in practices or other circumstances that may reduce yield potential.

### Duties in the Event of Damage or Loss

You must perform the following duties in the event of damage or loss:

- Protect the crop from further damage by providing sufficient care;
- Notify your crop insurance agent within 72 hours of your initial discovery of damage; and
- Give 15 days notice before any production from the damaged unit is sold by direct marketing unless your records verify that the direct-marketed production was weighed and graded through a packing shed.

### Definitions

**Approved Yield** - The average of the actual production history (APH) yields, assigned or adjusted yields, or unadjusted transitional yields that your insurance company calculates and approves.

**Bushel** - Fifty pounds of ungraded peaches.

**Direct Marketing** - The sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shipper, or broker.

**Fresh Peach Production** - Peach production from insurable acreage that:

- Is sold or could be sold, for human consumption, without undergoing change in the basic form, such as peeling, juicing, or crushing;
- Grades at least U.S. Extra No. 1 or better and consists of a 2-1/4 inch minimum diameter;
- Is shown as fresh peaches on the acreage report;
- Follows recommended cultural practices in use for fresh peach acreage in the area in a manner recognized by agricultural experts;
- You certify that at least 50 percent of the production was sold as fresh peaches in 1 or more of the 4 most recent crop years; and
- Is sold or could have been sold for a price that is not less than the fresh peach price election.

	300	Bushels Approved APH yield
X	0.65	Coverage Level
	195	Bushels Production Guarantee
-	50	Bushels Production-to-count
	145	Bushels Loss
X	20.00	Price Election
	<b>\$2,900</b>	<b>Indemnity per Acre</b>

**Price Election** - The value per bushel for the purpose of determining premiums and indemnity under the policy. Price elections are posted on the RMA website at the [Web Actuarial Information Browser](#).

**Processing Peach Production** - Peaches from insurable acreage that are:

- Sold or could be sold for peeling, juicing, or crushing; or
- From acreage designated as processing peaches on the acreage report.

**Production Guarantee** - Bushels guaranteed per acre determined by multiplying your approved yield by the coverage level percentage you elect.

## Coverage Levels and Premium Subsidies

Coverage levels range from 50 to 75 percent of your approved yield. For example, an approved yield of 250 bushels per acre results in a guarantee of 175 bushels per acre at the 70 percent coverage level. Crop insurance premiums are subsidized as shown in the following table. For example, if you select the 70 percent coverage level, your premium share would be 41 percent of the premium.

Item	Percent					
Coverage Level	50	55	60	65	70	75
Premium Subsidy	67	64	64	59	59	55
Your Premium Share	33	36	36	41	41	45

Catastrophic Risk Protection (CAT) coverage is fixed at 50 percent of your approved yield and 55 percent of the price election. CAT is 100 percent subsidized with no premium cost to you. There is an administrative fee of \$300 per crop, per county regardless of the acreage.

## Supplemental Coverage Option

SCO is available in some counties. Talk to your insurance agent for availability.

## Loss Example

Assume 65 percent coverage level, 100 percent price election of 20.00 per bushel for fresh peach production, 100 percent share, 300 bushels per acre approved APH yield, and 50 bushels production-to-count due to an insurable cause of loss on a one-acre unit.

## Where to Buy Crop Insurance

All multi-peril crop insurance, including CAT policies, are available from private crop insurance agents. A list of crop insurance agents is available at all USDA service centers and on the RMA website at the [Agent Locator Page](#)
